

STEPS:

1. Choose a circle and trace it on your paper.
2. Label your circle.
3. Carefully measure the circumference of your circle. Record that measurement, $C =$
4. Measure the diameter of your circle. $d =$
5. Divide the Circumference by the diameter. Calculate your answer to the thousandths place and then round to the hundredths place.
6. Circle your answer.

Example:

Circle A

$C =$ _____

$d =$ _____

$C/d =$ _____

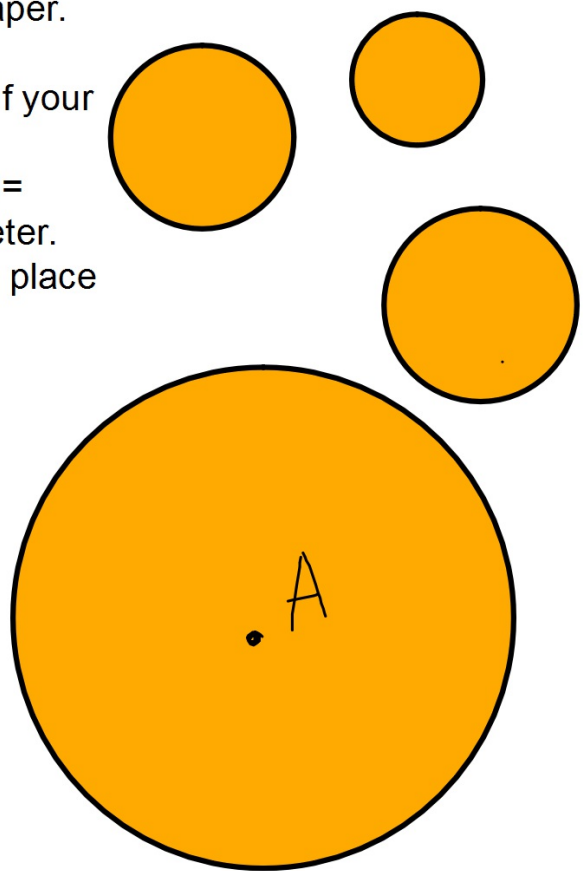

Shapes:

B - bowl

C - cup

D - plate

E - CD disk

Period 5 May 9

Parallelograms:

Find the Area.

1. $A = bh$

$$b = 4.5 \text{ in.}$$

$$h = 2.5 \text{ in.}$$

$$A = 4.5 \times 2.5$$

$$A = \underline{\hspace{2cm}}$$

Show work -

2. $A = bh$

$$b = 10 \text{ ft.}$$

$$h = 5.75 \text{ ft}$$

$$A = \underline{\hspace{1cm}} \times \underline{\hspace{1cm}}$$

$$A = \underline{\hspace{2cm}}$$

3. $A = bh$

$$b = 12.3 \text{ cm}$$

$$h = 3.45 \text{ cm}$$

$$A = \underline{\hspace{1cm}} \times \underline{\hspace{1cm}}$$

$$A = \underline{\hspace{2cm}}$$
